

DanBred Boar

In a setup with on-farm AI the success of production is highly dependent of systematic boar management.

Target Group:

Buyer of DanBred on-farm boars for internal AI station or bigger pools of boars on-farm.

Target Requirement:

15-30 boars minimum.

Target Preference:

Possibility to implement all parts of DanBred On-Farm Boar Manual.

Agenda:

“DanBred Boar” skilled technical services managers evaluate production on farm level and pinpoints bottlenecks and possibilities for optimization with the goal to secure steady availability of high value quality semen for insemination.

Flow:

Exchange of information (KPI's and production setup)

Phone/skype meeting with TSM DanBred and farm manager/owner and other interests if needed

- Production status and farm description
- Goal
- Interventions – suggestions and acceptance (DanBred basics and advanced themes)
- Date for farm visit

Farm visit 1 (2 days on-farm)

- Day 1:
 - Farm audit (whole farm)
 - Presentation of current SOP's and techniques with boars
- Day 2
 - DanBred SOP's and interventions

Phone/skype meeting 3 weeks after farm visit

- KPI status
- Where are we on implementation?
- Next steps and goal

Phone/skype meeting 3 months after farm visit

- KPI status
- Where are we on implementation?
- Next steps and goal

Success criteria:

On-farm boars and AI supports production with steady supply of quality semen with low risk of dropout weeks due to mistakes etc.
